

Candy

Candy Chair is a simple assembly of six same sized wooden blocks to a metal frame made in round pipe. The name candy, because the wooden blocks remind us of the ice cream sticks and the crafts made using those sticks. Candy uses these wooden blocks as modules multiplied to form different products in this series, like a Cafeteria table. These 20mm thick wooden blocks, which form the seat and the back, are available in various wooden finishes like beach, mahogany, walnut, etc. or can be made in MDF and painted in any colour of choice.

Candy family also includes a revolving chair and bar stool. Here we have made them in cushion with upholstery in composite leather. The module structure of this chair allows us to play with materials, finishes and colours. The choice of finishes can change the chair's personality from quirky to elegant.

Candy's wooden block modules are multiplied to form different products in this series, like a bench, coffee table and tandem seating. The continuous seater can be made for two-seaters and three-seaters, depending on the layout. Finishes of the metal body can be customised, stainless steel or mild steel powder coating in any colour.
