

Peak

Peak has been one of our bestsellers for many years now. As we call it, it is a very rough and tough chair and requires low maintenance. Well shaped and contoured compressed wood components make Peak's Seat and Back. A flat rectangular pipe is bent to achieve the desired angles forming the frame of this chair. To separate the Back from the Seat, we assemble it into the metal frame. These stylish chairs are stackable and are available in various finishes like laminate, cushion, paint and veneer with polish.

For Peak, there is also an option of cushioned Seat and Back. We have also developed a revolving chair; these have no tilting and height adjustments and work best for compact spaces and visitors' seats. Bar stools with footrests can be combined with any high table. These high stools also have the option of a fixed base.

Peak is a very lightweight Tandem Seating. We can customise the layout and number of seats and tops of the Tandem Seating according to the client and site's requirements. We also recommend chairs with laminated Seat and Back for public spaces as they are low in maintenance and have a longer life.
